1. Prep & coat skillet

Preheat oven to 350°F with a rack in the center. Grease the bottom and sides of an 8-inch heavy ovenproof skillet (preferably cast iron) with **butter**.

In a medium bowl, set **all of the cream cheese** and **4 tablespoons butter** aside at room temperature to soften until step 4.

2. Make cake batter

In a medium bowl, stir together **cake mix**, **1 large egg**, and **2 tablespoons water** until a thick batter forms (do not overmix). Stir in **chocolate chips** until evenly combined.

3. Bake cake

To prepared skillet, pour in **batter** and transfer to center oven rack. Bake until middle no longer jiggles and a toothpick inserted in the center comes out mostly clean, 15–22 minutes (this cake is best when it's slightly underbaked, and will continue to cook in the skillet). Allow **cake** to cool completely before frosting.

4. Make frosting

While cake cools, beat **softened cream cheese** and **butter** in bowl with an electric mixer until light and fluffy, 2–3 minutes. Add **confectioners sugar** and **2 tablespoons cocoa powder**; beat on low speed until sugar is blended. Increase speed to medium-high and beat until light and fluffy, 2–3 minutes more.

5. Frost & serve

Once **cake** has cooled completely, spread **frosting** evenly over top. Top with **sprinkles** and serve. Enjoy!

6. Pro tip: Softening Butter

Whack your butter with a rolling pin a few times to speed up the softening process!
